# ***1. Background***

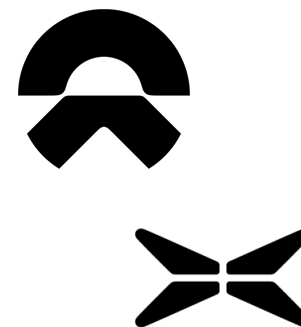

1° ВЪСКЪЛОНУЩА

# Introduction

- Li Auto Inc. also known as **Li Xiang**, is a Chinese electric vehicle manufacturer
- Li Auto was created by Li Xiang. The company builds electric vehicles that use range extenders for a power supply
- Li Auto is the only Chinese NEV startup that produces extended-range electric cars, as its peers, including Nio and Xpeng, focus on the development and production of pure electric vehicles.
- In 2020, the company debuted on the Nasdaq and had over a billion dollars with their initial public offering

# Terminology
